

Participation of Citizens' Committees

1170

The Board by its election and in conformity with Code requirements, has been charged with responsibility for the formulation of policy and the final determination of actions to be taken by the administration. It is also recognized that the Board can better perform its responsibilities if it has the means to determine the wishes of the District constituency.

Therefore, the Board may request the participation of representative citizens of the District in discussions of major policy decisions.

The administration is authorized to use advisory committees in all areas where appropriate. Particular consideration will be given to the appointment of advisory committees for each major vocational curriculum and for planning of programs of public interest which may be offered by the Colleges. The Board shall be consulted on selections for committee appointments.
