

Relation of Board to Management Personnel

2600

Under the provisions of Government Code 3540.1 (g) the Board of Trustees will designate as management positions those "having significant responsibilities for formulating district policies or administering district programs." Management employees thereby become responsible to the Board through the Chancellor for the efficient and effective administration of the programs of the District. This responsibility will be carried out through a cooperative effort among administrators, and more importantly, through mutual trust, respect, and cooperation between the Board and management.
