

Honors Courses and Programs

4236

The educational philosophy of the District requires that all students will be challenged to achieve their highest attainment level.

In order to accomplish this objective it is important that the Colleges offer honors courses and programs. Enrollment in these may be limited to students meeting established pre-and/or co-requisite coursework or to those students judged most qualified. Each college shall utilize fair and equitable procedures to meet such limitations on enrollment and these shall be published in the colleges' web sites and catalogs.

Title 5, Section 58106

Approved 6/3/63
