

Email FAQ: How do I change my FHDA email password?

To change your FHDA email account password, you will need your current [FHDA email username and password](#).

1. Log onto [Webmail](#) with your [username and password](#).
2. Click on the "**Change Password**" link (left column).
3. Enter your old password.
4. Enter a new password. Your new password cannot be a word that is found in a dictionary. You may have to try several variations of your desired password for the system to accept it. You may want to enter a number in the password somewhere.
5. Verify your new password.
6. Click on the "**Submit**" button.
7. Log out of Webmail.

Remember, once you change your email password, your Eudora may be set to remember old one and not allow you to check email. Give the Call Center a call if this happens.
