7	4/19/12	Project Agenda	Document Exchange Environment	On-going	Low	Vartan		Conversion/ Migration	In-Progress	
12	5/2/12	Sharon	We anticipate that there will be items unique to FHDA and further training is/will be made available at additional cost. What is the recommendation for formal training for our sys admins and application admins? It is unclear what training will be made available to the 'application' administration role and who will have the role of managing the resources (conference rooms and the moderators of those resources, if any) and the District calendar - holidays etc.	6/30/12	Moderate	Vartan	Jack	Deployment/ User Experience	Pending	
19	5/16/12	Project Agenda	Decided on Backup method –  Tom - We have decided that the Zenith appliance is the appropriate solution for implementing a data backup & recovery process for the Exchange platform. Assume you will work with STA on acquiring the appropriately sized appliance for the FHDA/Exchange platform.  It is my understanding that our support agreement with STA contains obtaining STA professional services assistance from STA to install and configure the Zenith if we determine we need their help – please confirm. Zenith Backup Appliance Decided. <b>6/20/12 - Ryan and Vartan to work on a backup work-around until Zenith can be installed.</b>	6/22/12	Critical	Vartan	Ryan	Technology	In-Progress	
20	5/16/12	Project Agenda	Stress testing of I/O and overall performance is required before going into final testing and production. Vartan suggests using Microsoft Jetstress utility <a href="http://technet.microsoft.com/en-us/library/ff706601.aspx">http://technet.microsoft.com/en-us/library/ff706601.aspx</a> . Using matrices Tom has used in the past and tools available in Exchange. A series of measurements will be applied and results available for review on 5/25/12. Vartan - Discussed with Tom and team briefly 6/4/12. We agree it is important, but we are short on resources right now. Adding another STA body doesn't help because Ryan and Norbert are also tied up with projects.  <b>6/20/12 – A work group will meet next week to decide on matrices and desired results.</b>	6/29/12	Critical	Tom	Norbert, Ryan, Vartan	Technology	In-Progress

37	5/26/12	Chien	Update documentation with changes for training	On-going	Moderate	Susan		Deployment/ User Experience	In-Progress	
46	5/26/12	Sharon	Options is managing cell phones - and one thing you can do is add your phone and then remotely WIPE all contents on your phone. This is HIGHLY dangerous for a novice user.  Jack – 6/21 - I researched the item below. Yes this option wipes the mobile device clean not just Exchange data. Every article or self-service help guide I read refers to reloading information from your phone backup such as iTunes, the cloud, etc. I would suggest an FAQ be written for this item stated caution should be used if this option is selected. However, I think it is a valuable tool to have if a device is lost or stolen. For iPhones and iPads this service is available through iTunes and iCloud.	6/22/12	Moderate	Jack	Susan	Deployment/ User Experience	Completed	
56	5/29/12	Sharon	District Holidays - will there be a District Group Calendar available for all to view? Or will a template calendar be set up as the basis for everyone's calendar so the District holidays show up? It was like this in Meeting Maker - Add to Crosswalk doc - <b>research method before adding to Crosswalk or documentation</b>	6/30/12	Moderate	Vartan	Sharon, Susan,	Deployment/ User Experience	Pending

63	5/29/12	Sharon	<p>Comparing Meeting Maker Department Calendars with Department Email accounts - remove duplicates - add Meeting Maker Dept. accounts to Tom Roza's Deployment lists. This is done to match the migrating group. Next list due: 6/22/12</p> <p>Chien to Sharon – 621 - During this morning's Banner student weekly meeting, both colleges are concerned about their departmental email accounts, they mentioned some of them are mission critical account they use to communicate to students regarding their registration announcement and issues.</p> <p>I know you are in the process sending and collecting this list from both colleges, and that is what I told both colleges, I also told them if we did not have the list or miss some of the accounts, they will still have access to the accounts in the legacy system. Once the account is set up, you will be the focus point to let them know the new password to login to the account.</p> <p>Tom is going to contact you to coordinate the list, any other issues, please let me know.</p>	On-going	Critical	Sharon	Josie	Deployment/ User Experience	In-Progress	
81	6/1/12	Chien	<p>Ryan - Since our mail attachment maximum size was lowered down to 2MB, errors will occur during the importing of messages that exceed this limit. I had about 20 errors related to this. I am guessing Daniel used email extensively to receive or transfer files.</p> <p>Vartan – 6/15/12 - Limits have been increased verified by Sharon and Tom. Leave item opened and state that CH1 will new the same settings for load balance scenario.</p> <p><b>6/20/12 Varten to verify limits, some still are getting attachments rejected. However, we are not sure they were received after the limes were upped.</b></p>	6/22/12	Moderate	Vartan	Sharon, Ryan, Fred, Norbert, Tom	Deployment/ User Experience	Completed

115	6/14/12	Marie Taylor-Harper	OWA Closing at unpredictable times using MacBook Pro and Safari  Have Tech Services check user's MacBook Pro and Safari settings - <i>maybe wireless</i>	6/29/12	Moderate	John V.		Deployment/ User Experience	In-Progress	
116	6/14/12	Tom	Can Exchange Detect Spam from compromised account? 6/14 - Update from Vartan: Actually that is what Abaca is for. That product without question should have those kinds of alerting features built in the system. As for Exchange, we can tighten up the Transport Server Security and setup some logs, but this sort of work is very tricky and will take some time to provision. The problem is this concept of False Positives and things. Do too much and you get too many alerts and so forth. 6/14 - Update from Tom: Abaca cannot detect possible mass spam deliveries. Outbound email does go thru the Abaca, but it's for the purpose of developing a profile of who the sender is communicating with. Will defer this discussion on configuring this Transport Server Security and setting up some logs until after we get everyone converted and the entire platform completely configured (Archive working, backup solution in place, etc.). 6/20 - Vartan says no, email spamming detection is outside of Exchange. 6/20 will research with Abaca and options for other methods. <b>6/21 – Tom:</b> Abaca spam firewall vendor does not have a capability to detect outgoing spam using some form of rate control. They are looking at this as a future capability. No further action can be taken	6/30/12	Moderate	Tom		Technology	Completed

120	6/16/12	Tom	Tom - The mailbox server lost connection to the Exchange database - why is unknown at this time. Vartan, another tech from STA, and Ryan Anthony worked together to analyze the state of the entire platform and restarted a number of services to re-establish normal operations for the platform. That apparently worked since the Exchange platform is operational as you already have discovered. Root cause of the original problem is unknown as far as I know. Vartan and his team are continuing problem diagnostic work to determine root cause and develop permanent corrective action. Vartan - We got a call approximately at 4:30. Tom reported he couldn't log into Exchange. I called ACE and we quickly realized that somehow MB1 had lost it's ability to contact the Disk which holds the VM Guest information. We restarted it hoping for a quick fix because all of the other systems on the same disk were fine. <u>After reboot we had a conference call with Ryan, Tom and Ace share</u>	6/22/12	Critical	Vartan		Technology	In-Progress	
121	6/15/12	Sharon	I have asked to be on both College Distribution lists in Meeting Maker so I can keep tabs on what is going on with the colleges. How are we setting up Distribution lists and what are rules we are going by right now for allowing users to add themselves to distribution lists? This is going to become important come post July 6th. Tom 6/18 - I am not aware of any discussions that have been held since the Exchange project began where there the topic of Exchange Calendaring invitation lists was brought up, what "rules" or policies govern them, and if there is even a way for people to opt in or opt out of an Exchange meeting invitation list. For Jack: This issue cannot be resolved via email – I assume it needs	7/15/12	Low	Sharon	Ryan, Matt, Norbert, Tom, Chien, Susan	Deployment/ User Experience	Pending	
124	6/18/12	Susan	Have dozens of these Synchronization Log e-mails in my unread folder on the desktop. I didn't see them in OWA. The first message is dated 6/1 at 4:18 PM		Moderate	Vartan	Shelby	Deployment/ User Experience	Pending	
125	6/21/12	Carmen Redmond	Frank Greco not converted to Exchange; can still log into Sendmail 6/21 Update: This person's account was included on the Cent Serves conversion report. The account shows in Exchange directory. Asked user to confirm they have not been converted.	6/22/12	Critical	Vartan		Conversion/ Migration	In-Progress

131	6/25/12	Vartan	<p>STA 's conversion process used the wrong Exchange Mailboxes on the disk array. Instead of using MB1, MB2, and MB3 which Ryan had setup and configured for our eventual full production allocation, the STA script stored the converted accounts in a Mailbox called MB4.</p> <p>STA has corrected their script for upcoming conversions, but I confirmed with Vartan that STA needs to move these mailboxes from MB4 to MB1,2,3 or we will encounter out-of-disk space problems that will result in service failures for employees.</p> <p>This will be solved over several night of moving the data. No schedule outage needed or user interruption expected.</p>	6/26/12	Moderate	Vartan	Ace	Conversion/ Migration	In-Progress	
132	6/25/12	Norbert	<p>The script that sets the forwarding on the Sendmail accounts did not execute properly Friday afternoon due to a logic problem. When an email account that uses an apostrophe in the email address (e.g., O'Malley) was encountered, the script treated this as an end-of-input file trigger and ended without completing the forwarding on the remainder of accounts. Since the script did not technically abort, when it completed, it issued a zero return code which led us to believe it had completed successfully. In actuality, 627 accounts were not processed.</p>	6/26/12	Critical	Vartan	Norbert, Ace	Conversion/ Migration	Completed	
133	6/25/12	Lisa Kirk	<p>There are two emails in the Public Folder (OWA) that have to be deleted: One from Scottie McDaniel; One from Ly Luu</p> <p>There are employee entries in Public Folder Tom - Asked Ryan to delete entires from Public Folder</p>	6/29/12	Moderate	Ryan		Conversion/ Migration	In-Progress	
134	6/25/12	Chien - for Jerry Rosenberg	<p>Thank you for your call today to ask about the conversion process. As I reviewed my new outlook (web) mail, I noticed that I am missing about a week's worth of emails from 6/7 to 6/14 2012. I have checked pretty carefully, and cannot seem to find the emails that appear in my old email clients. I would appreciate if someone could check to see if the emails exist in the new account.
