

## De Anza College Wireless Network

Wireless at Foothill-De Anza Community College District is mainly for the Students. The wireless network is divided into segments to provide different levels of service based on the intended use. The wireless network is not being deployed for use by employees to access secure systems such as the Student Information System (SIS), Financial or Human Resources systems in Banner.

The **De Anza Guest** wireless network segment located in the Library (Learning Center) and the Dining rooms at the Campus Center provides guest access to the Internet. This access is similar to what you would have at home or in a commercial Internet Cafe. The user provides an email address to gain access to the wireless network.

The **De Anza College** wireless network segment provides wireless network service to those who have a relationship with the District. Anyone with a **Student ID** or **Employee ID** has the ability to use this wireless network. This segment of the wireless network is set up to provide access to additional services not available via the Guest wireless network and to provide the appropriate level of service when using wireless in the classroom. You will find this wireless network available in classrooms and conference rooms.

The **De Anza Lab** wireless network segment is set up for those classrooms and labs with dedicated College provided laptops. These laptops will receive the appropriate level of service to conduct the class. This wireless network segment is not available to other wireless devices.

The **De Anza Visitor** wireless network segment is for visitors who are on site for a short period of time for college and district business purposes. A few Administrative Assistants throughout the District will have the privileges to create temporary visitor accounts. The De Anza Visitor wireless network will be available mainly in conference rooms.

# Instructions for Employees

Employees use their Employee ID (Banner - myportal.fhda.edu login name) and password (Banner password- myportal.fhda.edu) to log in to the **De Anza College** wireless network. *If you were an employee prior to the Banner conversion, your old six digit PIN is still a valid for the wireless network. These two passwords will work with the wireless authentication system for an undetermined period of time, as the District continues its transition to Banner.*

## Connecting to the De Anza College Wireless Network:

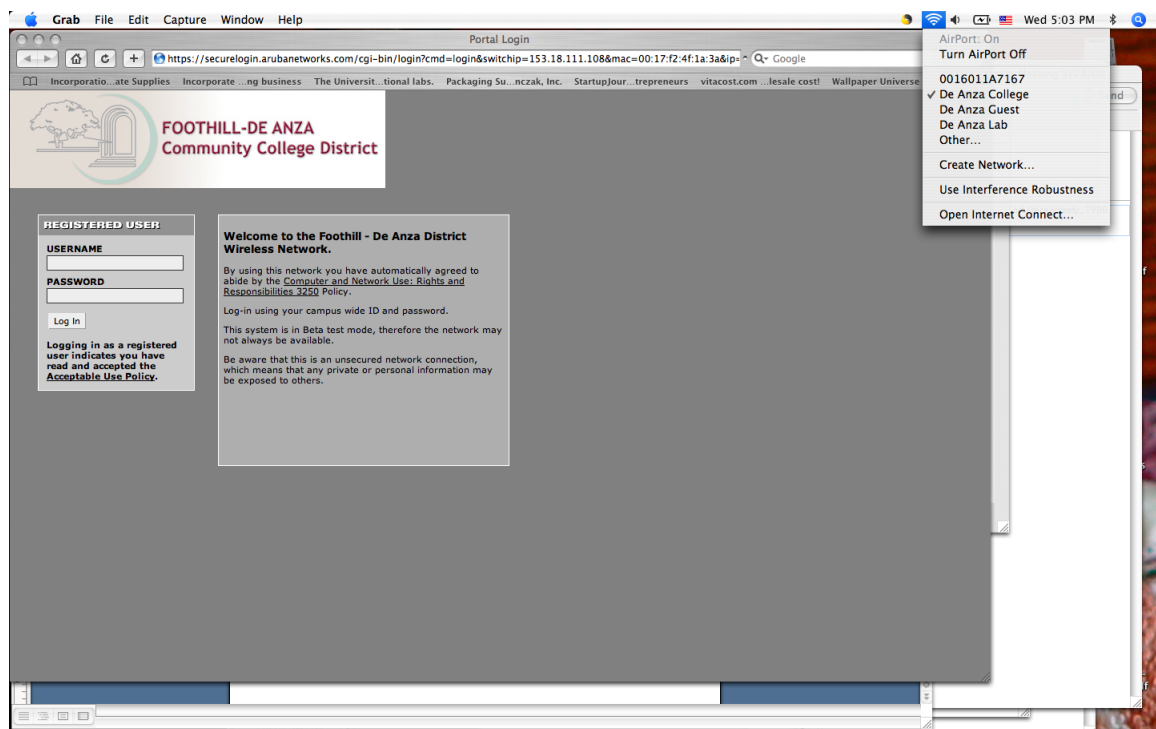

Select the **De Anza College** Wireless Network on your computer (example below uses an Apple Laptop):

## Launch a Browser and the Log In Web Page should appear:

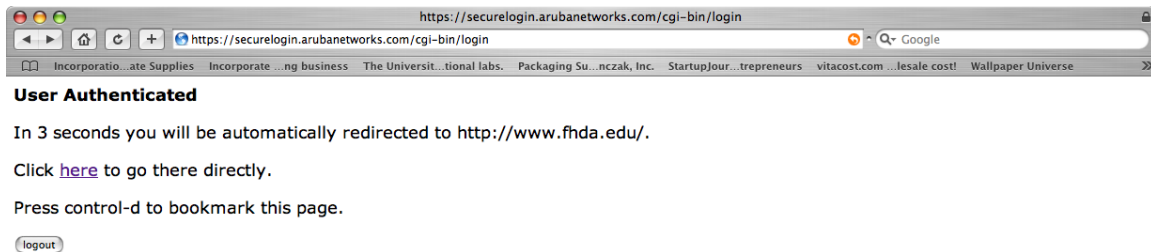

Not all browsers will bring up the log in web page.

*(Safari works best for Apples, IE for Windows)*

Type your Employee ID in the username field and Banner/myportal password in the password field. Then click on **Log In**.

The window below should appear briefly and then your browser home page will appear. You are now connected to the wireless network. . (Example below shows redirection to a particular user's home page. The message you see will state your home page.)

**Refer to the Q&A document for more information:** A separate Q&A sheet was developed. It may help if you have difficulties connecting to the wireless network.
