Board of Trustees Agenda Item

Board Meeting Date: 5/2/11

Title of Item:

De Anza College Stadium and Track Project #206 - Schematic Design Presentation

Background:

Programming and schematic design phases of the De Anza College Stadium and Track at De Anza College Measure C # 206 have been completed. The design has been developed by Verdi Design Inc. in collaboration with the District and De Anza College faculty and staff.

The project will replace the existing track and football field. The plan repositions a new synthetic turf football field and an all-weather track towards the north end of the complex, providing space for the full complement of NCAA track and field events. Existing bleachers will be removed and new ADA-accessible bleachers will be installed on the west side of the field, provide seating for 1,500 people and a new press box and camera stand. On the east side, there is space allocated for a future 500 seat bleacher at mid-field.

The adjacent softball field upgrades include modular dugouts, revised backstop, new batting cage and tall perimeter netting. ADA compliance items include minor remodeling at field restrooms and pathways improvements.

The project is scheduled for construction during the winter, spring and summer quarters of 2012. The design is outlined in the attached presentation. The construction budget for the current design is \$5,325,528.

Recommendation: Charles Allen, Executive Director of Facilities, Operations and Construction Management recommends approval for Verdi Design Inc. to proceed with design and completion of construction documents for the De Anza College Stadium and Track Project #206
