REVENUE ACCOUNT CODES

- Income received from outside sources (ie. federal grants, state apportionment, sales or services provided to companies or organizations) are correctly posted to revenue account codes.
- Purchase rebates are not considered revenue - they are offsets, or reductions, to expense - and should be credited to the account code that was originally charged.
- When one department invoices another department for services provided, this is considered a chargeback. Paperwork should be sent to the campus budget analyst or to district accounting for processing.
- Expenses should not be charged to revenue account codes.
- The program code to be used with revenue account codes is always 900000.
