Welcome to your 2011 Three-Tier Prescription Drug List

Your UnitedHealthcare pharmacy benefit offers flexibility and choice in finding the right medication for you.

Our goal

We want you to get the most out of your pharmacy benefit. This guide will:

1. Help you understand your medication choices.
2. Help you understand which questions to ask your doctor or pharmacist.

What is a Prescription Drug List (PDL)?

A PDL is a list that places commonly prescribed medications for certain conditions into tiers. The list includes brand and generic prescription medications approved by the U.S. Food and Drug Administration (FDA). When choosing a medication, you and your doctor should consult the PDL to help you get the most out of your prescription medication benefit.

Please note that there may be some medications on the PDL that are not covered under your prescription medication benefit. Please look at your benefit plan documents¹ provided by your employer or health plan to see what medications are covered under your plan.

¹ Benefit Plan Documents include a Summary Plan Description (SPD) or a Certificate of Coverage (COC)

Understanding Tiers

Prescription medications are placed into tiers. Each tier is assigned a cost, which is determined by your employer or health plan. This is how much you will pay when you fill a prescription. Tier 1 medications are your lowest-cost option.

Check your benefit plan documents to find out the specific copayments, coinsurance, and deductibles that are part of your plan. **Some plans may require you to pay the full cost of prescription medications until the plan deductible has been met.**

Tier 1 – Your Lowest-Cost Option

Tier 1 medications are your lowest-cost option. For the lowest out-of-pocket expense, consider Tier 1 medications.

Tier 2 – Your Midrange-Cost Option

Tier 2 medications are your midrange-cost option.

Tier 3 – Your Highest-Cost Option

Tier 3 medications are your highest-cost option. If you are currently taking a Tier 3 medication, ask your doctor if there is a lower-cost Tier 1 or Tier 2 medication that may be right for you.

Note: Compounded medications are medications with one or more ingredients that are prepared “on-site” by a pharmacist. These are classified at the Tier 3 level.

Please note: *Some plans have a two-tier pharmacy benefit rather than a three-tier pharmacy benefit. Generally, a two-tier closed pharmacy benefit plan does not cover medications classified in Tier 3 of this PDL. A two-tier open pharmacy benefit plan covers one tier at the lower-cost and covers a second tier at a higher-cost.*

*In addition, some plans have a four-tier prescription plan. Refer to your enrollment materials, check the Drug Pricing/Coverage information on **myuhc.com**®, or call the toll-free member phone number on the back of your ID card for more information about your benefit plan.*

Who determines medication tier placements?

The UnitedHealthcare PDL Management Committee makes tier placement decisions. The PDL Management Committee is comprised of senior level UnitedHealth Group physicians and business leaders. The Committee’s goal is to help ensure access to a wide range of medications, while helping to control health care costs for you and your employer or health plan.

What factors does the PDL Management Committee look at to make tier placement decisions?

The PDL Management Committee decides the tier placement of a particular prescription medication based on clinical information from the UnitedHealthcare Pharmacy and Therapeutics (P&T) Committee and economic considerations.

When do medications change tiers?

Medications may change tiers two times per calendar year. Changes occur on January 1 and July 1. When a generic medication becomes available, the tier placement of both the brand and generic medication are evaluated. Medications may change tiers with this evaluation.

When a medication changes tiers, you may have to pay a different amount for that medication. These changes may occur without prior notice to you. For the most current information on your pharmacy coverage, please call the toll-free member phone number on the back of your ID card or visit **myuhc.com**.

What is the difference between brand-name and generic medications?

FDA approved generic medications contain the same active ingredients as brand-name medications, but they often cost less. Generic medications become available after the patent on the brand-name medication expires. At that time, other companies are permitted to manufacture an FDA approved, chemically equivalent medication. Many companies that make brand-name medications also produce and market generic medications.

The next time your doctor gives you a prescription for a brand-name medication, ask if a generic equivalent or lower tier alternative is available and if it might be right for you. Generic medications are usually your lowest-cost option. Please note that some generic medications may be in Tier 2 or Tier 3 and will not have the lowest copayment available under your pharmacy benefit plan. Visit **myuhc.com** for more information about generic medications.

Why is the medication that I am currently taking no longer covered?

Medications may be excluded from coverage under your pharmacy benefit. For example, a medication may be excluded from coverage when it is therapeutically equivalent to another prescription medication or an over-the-counter (OTC) medication. Therapeutically equivalent means that medications can be expected to produce essentially the same therapeutic outcome and toxicity. There may be alternatives on the PDL or OTC medications that are right for your treatment.

When should I consider discussing over-the-counter (OTC) medications with my doctor?

An OTC medication may be the right treatment for some conditions. Talk to your doctor about OTC options. These medications are not covered under your pharmacy benefit, but they may cost less than your out-of-pocket expense for prescription medications.

Why are there notations (SL, N, etc.) next to certain medications in the PDL, and what do they mean?

The notations refer to our pharmacy programs. The definition is listed at the bottom of each page. These programs may help confirm coverage based on your benefit plan.

Please call the toll-free member phone number on the back of your ID card if you need additional information about these notations.

What should I do if I use a self-administered injectable medication?

You may have coverage for self-administered injectable medications through your pharmacy benefit plan. UnitedHealthcare has developed a specialty pharmacy network for these medications. Please call our toll-free Specialty Pharmacy Referral Line at 1-866-429-8177. A representative will answer questions about our program and then transfer you to a specialty pharmacy based on your particular specialty medication prescription.

How do I access updated information about my pharmacy benefit?

Since the PDL may change, we encourage you to visit **myuhc.com** or call the toll-free member phone number on the back of your ID card for more current information.

Log on to **myuhc.com** for the following pharmacy information and tools:

- Pharmacy benefit and coverage information
- Possible lower-cost medication alternatives
- A list of medications based on a specific medical condition
- Medication interactions and side effects
- Locate a participating retail pharmacy by zip code
- View your prescription history

And, if mail order is included in your pharmacy benefit, you can also:

- Refill prescriptions
- Check the status of your order
- Set up e-mail reminders for refills
- Manage your account

What if I still have questions?

Please call the toll-free member phone number on the back of your ID card. Representatives are available 24 hours a day (except Thanksgiving and Christmas).

If you have pharmacy benefit coverage with UnitedHealthcare, you may learn more about your benefit by visiting **myuhc.com** or by calling the toll-free member phone number on the back of your ID card. If you are not currently enrolled with UnitedHealthcare for pharmacy benefit coverage, you may access **welcometouhc.com** for additional information during your open enrollment period or you may contact your employer or health plan for additional information.

In certain documents, the Prescription Drug List (PDL) was referred to as the "Preferred Drug List (PDL)." This change in descriptive terms does not affect your benefit coverage.

Medications are categorized by common therapeutic conditions in this PDL reference guide for ease of reference only. These categories do not determine coverage for the medication for your condition. Your benefit plan determines how these medications may be covered for you.

The PDL may change periodically. Where differences are noted between this PDL reference guide and your benefit plan documents, the benefit plan documents will govern. For the most current PDL information, log on to **myuhc.com**.
