      i. Make sure the dedicated classroom Dell or iMac is powered on.
      ii. Press the "***PC***" button.
   b. **Laptop:**
      i. Plug the VGA cable from the input panel to the laptop's VGA out.
      ii. **Make sure your laptop is set to output external VGA**.**
      iii. Connect the audio cable to the headphone jack of the laptop.
      iv. Make sure your laptop volume is turned up.
      v. Press the "***LAPTOP***" button.
   c. **DVD:**
      i. Insert a DVD.
      ii. Press the "***DVD***" button.
      iii. Use the DVD Controls on the panel.
   d. **VCR:**
      i. Insert a VHS tape.
      ii. Press the "***VCR***" button.
      iii. Use the VCR Controls on the panel.
   e. **Document Camera:**
      i. Turn the Document Camera power on.
      ii. Press the "***DOC CAM***" button.
   f. **S-Video Input:**
      i. Connect the S-Video source to the input panel.
      ii. Connect the audio source to the RCA jacks on input panel.
      iii. Press the "***S-Video***" button.
3. To turn off the system press the "***OFF***" button.
   [Wait 2 minutes for the projector to cool off before turning back on.]

**Most laptops require a combination of keystrokes to enable the external VGA output.
Dell laptops usually require you hold down the blue "Fn" key and press the "F8" {CRT/LCD} key.
Apple laptops usually require the "option" and "F7". Repeat keystrokes to toggle display mode.
