

### **Agenda for Team Meeting June 17, 2014**

- Status of hiding SSB Add Documents & View Documents buttons from people who are not a part of one of the B-F-DOCS or B-F-ID security classes.
- How are things going for Asha Harris?
- When user encounters the “A unique key violation has occurred” message, the icon for “Select Indexes” does not display for Annette and Asha. It was determined that they are using Firefox and other users who are using a different browser are not having the problem. Annette will test with a different browser and see if she is still has the problem. She will report back to Deepa.
- When AP added additional users they determined that there needs to be coordination between Martin Varela who controls access to Finance and Bill Baldwin who controls Banner security. Joe Lampo will discuss with Chien and Ellen will discuss with Hector with the goal of getting the two key people to communicate and coordinate any future requests.
- Any other pressing issues?
- Next meeting – July 1st?
