Re: Availability of the Draft EIR for the Foothill College Master Plan Project State Clearinghouse #2007091014

Project Location: Foothill College is located at 12345 El Monte Road, Los Altos Hills, in Santa Clara County.

Project Description: The Project proposes construction, renovation, and site improvement projects on the Project site to accommodate an estimated increase in enrollment at the College of approximately 2,839 students over the next ten years. The Project proposes the construction of two buildings providing approximately 62,500 square feet of building space, including approximately 41,000 square feet of assignable space. Other project components include pedestrian, vehicle, and bicycle improvements; parking lot expansions; various utility, landscaping, signage, lighting, and site improvements and upgrades; renovation of sport facilities and campus buildings; and ongoing Americans with Disabilities Act (ADA) improvements. All facilities would be developed within the existing Foothill College campus boundaries.

Realignment of the Campus Road originally proposed under the Master Plan has been eliminated and is no longer proposed by the Foothill De Anza Community College District as part of the Project.

Environmental Review: Based on the preliminary project description, it was determined that the Project may have a significant impact on the environment; therefore, a focused Environmental Impact Report (EIR) was prepared, under the requirements of the California Environmental Quality Act (CEQA). The DEIR analyzes potentially significant impacts to air quality, biology, cultural resources, noise, and traffic.
