

**Same bottle. Same medication. Same pharmacy.  
So why does one cost 50% less?**

# Introducing the Half Tablet Program.

## The easy way to cut your prescription medication costs in half.

You can dramatically lower your costs on select medications that you take on a regular basis by using higher dosage tablets and splitting them in half. Here's how it works:

1. Your doctor writes a new prescription for twice the dosage and half the quantity, noting your intent to split the tablets on your prescription.
2. Fill the prescription, automatically paying only half your usual copayment.
3. Split each tablet and take half – you get your usual supply for half the cost.

With the Half Tablet Program, you take the same medication at the same dosage, yet save money – up to hundreds of dollars every year – on medications you take on a regular basis.

Get your **FREE** tablet splitter by calling  
**1-877-471-1860**. For more information

This is a voluntary program. Not all medications are appropriate for tablet splitting. The medications in this program have been selected because they meet the requirements deemed appropriate for splitting. Consult your doctor before splitting any prescription tablets. Only split tablets with a device designed specifically for that purpose. Follow the instructions that are provided with your tablet splitter. ©2007 UnitedHealthcare. All rights reserved. 100-8116
