

FOOTHILL - DE ANZA COMMUNITY COLLEGE DISTRICT  
Office of Human Resources & Equal Opportunity

**TUBERCULIN SKIN TEST (TST) FORM**

Pursuant to Education Code Section §87408.6, all new employees (unless they have previously tested positive followed by a negative chest x-ray) are required to have a Tuberculin Skin Test (TST) and any follow-up completed within sixty (60) days from the first day of service.

Health Services at each campus offer the TST free of charge. You may contact their office with any questions: De Anza (408) 864 - 8732 or Foothill (650) 949 - 7243.

Those employees who test positive with a TST must have a chest x-ray to rule out active Tuberculosis. Health Services will refer the employee to the appropriate medical facility.

Those employees who have previously tested positive are required to provide evidence of the positive TST followed by a negative chest x-ray. Such evidence shall be taken in person to the campus Health Services office.

**PLEASE TAKE THIS FORM WITH YOU WHEN YOU HAVE YOUR TST TEST TAKEN.**

***To be completed by employee:***
